Summary

Enthusiastic and dedicated Computer Science graduate with hands-on knowledge of Python, C/C++, and data structures. Seeking an entry-level opportunity where I can enhance my technical abilities, gain real-world experience, and support organizational growth.

Skills

Programming & Querying: Java, Python

Data Visualization Tools: Advanced MS Excel, Power BI, Tableau

Analytical Abilities: Data analysis, logical reasoning, critical thinking, pattern recognition, problem solving, attention to detail.

Projects

Weather forecasting | *Python*

March 2025 – April 2025

- Built a GUI-based weather application using **Python Tkinter**
- Integrated REST API to fetch real-time weather data
- Displayed temperature, pressure, and weather conditions dynamically.
- Converted temperature from Kelvin to Celsius for better usability.

Weather Forecast Application | *Python, Tkinter, REST API*

2025

- Built a desktop-based weather application using **Python Tkinter** to display real-time weather updates.
- Integrated **OpenWeatherMap API** using the requests library to fetch live weather data.
- Designed an interactive GUI with dropdown selection for **30+ Indian states**.
- Implemented temperature conversion from Kelvin to Celsius for user-friendly output.
- Displayed key metrics including weather condition, description, temperature, and pressure.

Education

Bachelor of Technology in Computer Science & Engineering

Maharana pratap Engineering College, Kanpur

CGPA: 6.7 / 10
